

Beeulah Marry

Product Designer • UI/UX Designer

Tenkasi, India | beeulahmano@gmail.com | linkedin.com/in/beeulahmano19 | reemabee.in

Product Designer with 3+ years designing end-to-end experiences for complex B2B systems across safety-critical robotics interfaces, IoT dashboards, browser-native SaaS, and Android instrumentation apps. Sole designer at Pilabz Electromechanical Systems, a Zoho subsidiary, owning UX research, interaction design, UI design, design systems, and developer handoff. Joined before any design process existed — built UX workflows, design systems, and handoff standards from scratch across a hardware-software product company.

Experience

Pilabz Electromechanical Systems — UI/UX Designer

May 2024 – Present
Tenkasi • Full-time • Sole Designer

- Designed the end-to-end Android app for a 4-in-1 wireless electrical instrument (DMM, LCR, 1P & 3P PQA). A/B tested portrait vs landscape; chose landscape for field use and data density. Unified four modes with probe guidance and live reading states. Usability testing: 2x faster first reading, 70% less mode confusion.
- Designed the operator interface for an AMR robot control system covering connection states, mission setup, live map monitoring, safety-critical emergency controls, and operator override flows. Prototype testing showed 92% task success on robot readiness and 2x faster route understanding with a map-first layout.
- Designed a browser-native motor simulation SaaS platform for engineers, EV teams, and students, covering guided input flows, simulation states, admin module, design system, landing pages, and output views. Beta testing showed 60% better setup comprehension and 2x faster first simulation run.
- Designed an always-on ambient IoT dashboard for the Zoho Tenkasi campus using distance-calibrated typography and impact-led hierarchy for non-technical audiences across varying viewing distances.
- Designed end-to-end product UI for web-based instrumentation tools including milli-ohm meter, power analyser, and power supply, covering real-time data visualisation, device control states, and responsive interaction design.
- Overhauled the Pilabz brand identity across legibility standards, colour compliance, multi-scale rendering, UI application, packaging, and product collateral, creating a unified visual language from screen to physical product.
- Driving early-stage UX strategy and competitive research for a cloud-based CAE simulation platform — defining core UI patterns and product architecture for an AI-integrated engineering tool planned to support prompt-driven simulation and standalone deployment.

Tentacle Technologies — UI/UX Design Intern

May 2023 – May 2024
Remote • Kuala Lumpur, Malaysia

- Designed end-to-end web and mobile product flows for Artoons, a B2C marketplace for child creators and parent buyers, covering research, journey mapping, wireframing, high-fidelity UI design, and developer handoff under a lead designer.
- Applied WCAG accessibility standards and age-appropriate interaction principles through usability testing and iterative design cycles, ensuring the experience was legible and trustworthy for child users and parent buyers.

Skills

Design UI Design, UX Design, Product Design, Interaction Design, Visual Design, Responsive Design, Mobile App Design, Dashboard Design, SaaS Design, Enterprise UX, Accessibility

Systems Design Systems, Component Library, Design Tokens, Information Architecture, User Flows, Wireframing, Prototyping

Research User Research, User Interviews, Usability Testing, A/B Testing, Journey Mapping, Affinity Mapping, JTBD, Personas, Competitive Analysis, Insight Synthesis

Product End-to-End UX, Design Handoff, Design QA, Cross-functional Collaboration, Stakeholder Management, Product Thinking, Web App Design, IoT UX

Tools Figma, FigJam, Framer, ProtoPie, Miro, Maze, UX Pilot, Galileo AI

AI & HCI AI-Augmented Design, Human-AI Interaction, Trust-Critical UI, Error Recovery

Education & Certifications

B.Tech — Information Technology SRM Valliammai Engineering College, Chennai • 2019 – 2023 • 86%

Google UX Design Certificate Google / Coursera • Jan 2023

Generative AI for UI/UX Design IBM / Coursera • May 2026
