

Beeulah Marry

Product Designer • UI/UX

Tenkasi, India | beeulahmano@gmail.com | linkedin.com/in/beeulahmano19 | reemabee.in

Product Designer with 3+ years of experience shaping end-to-end product experiences across B2B industrial SaaS, IoT instruments, real-time dashboards, and safety-critical systems. Sole designer at Pilabz, a Zoho subsidiary, owning UX, UI, branding, product workflows, and design system decisions. Focused on simplifying complex technical products through clear interaction design, scalable systems, and AI-augmented workflows.

Experience

Pilabz (Subsidiary of Zoho) — UI/UX Designer

May 2024 – Present | Tenkasi

Sole designer — full ownership across UX, UI, branding, product workflows, and system-level design thinking.

- Owned the end-to-end product experience for a browser-native engineering SaaS web app, covering user and admin modules, topology-based workflows, simulation states, landing pages, light/dark modes, and scalable design system patterns.
- Designed the end-to-end mobile app experience for a 4-in-1 wireless instrument; built clear landscape UI flows for live readings, logging, mode switching, device connection states, visual hierarchy, and error feedback, with ownership extending from app UI to retail packaging. UI quality was acknowledged by Zoho founder Sridhar Vembu.
- Designed the end-to-end product experience for an AMR robot control system, covering mission setup, live map monitoring, robot status visibility, safety-critical action states, operator override, emergency handling, and persistent stop controls.
- Shaped an always-on ambient IoT dashboard experience at Zoho Tenkasi campus using distance-calibrated typography and impact-led information hierarchy for non-technical audiences.
- Designed product workflows for web-based instrumentation tools including milli-ohm meter, power analyser, and power supply, covering real-time data visualisation, device control, and responsive interaction states.
- Overhauled Pilabz brand identity across legibility, colour compliance, multi-scale rendering, UI usage, packaging, and product collaterals.
- Currently leading UX and competitive research for a cloud-based CAE simulation platform, scoping product architecture, core UI patterns, and AI-integrated engineering workflows.

Tentacle Technologies — UI/UX Design Intern

May 2023 – May 2024 | Remote, Malaysia

- Designed web and mobile e-commerce marketplace flows for child creators and parent buyers, from research and journey mapping to high-fidelity prototypes and developer handoff.
- Created WCAG-compliant, age-appropriate product flows for child creators and parent buyers through usability testing and iteration.

Skills

Product Design End-to-end UX, Interaction design, Technical UX, Complex workflows, Wireframing, High-fidelity UI, Responsive design, Accessibility, Design systems, Design tokens, Brand identity

Research User interviews, Usability testing, Journey mapping, Affinity mapping, JTBD, Personas, Insight synthesis, Systems thinking, Data interpretation

AI & Emerging AI-augmented design, Human–AI interaction, Trust-critical UI, Error recovery

Tools Figma, FigJam, Framer, Miro, Maze, ProtoPie, UX Pilot, Galileo AI

Education & Certifications

B.Tech — Information Technology SRM Valliammai Engineering College, Chennai • 2019 – 2023 • 86%

Google UX Design Google • Coursera • Jan 2023

Generative AI for UI/UX Design IBM • Coursera • 2026
